- Identify key environmental, developmental, procedural, and policy issues relating to Federal natural resource management and conservation in the Southeast.
- Build partnership opportunities with state, local, and other entities and promote sustainable community development.
- Support, encourage, and undertake innovative research that supports research and research on
- Communicate with the

The Northern Appalachian Mountains cover more than 57 million acres from Northern Alabama to Virginia.

The rivers of the Southeast are among the most diverse temperate freshwater ecosystems in the world.

The Southeast has more miles of coastline than any other region in the U.S.—more than one-quarter of the total continuous U.S. coastline.

Forests are a dominant feature on the Southeastern landscape, occupying more than 60% of the region.

Nearly half (48.9 million acres) of the wetlands in the conterminous United States are in 10 states of the Southeast.

Employer Service Program Mission

To assist employers in the planning and implementation of commute options and operations and maintenance programs that mitigate traffic congestion and improve air quality.

Bottom Line Benefits for Employers

- Better Recruitment/Retention
- Improved Productivity
- Reduced Absenteeism
- Reduced Parking Costs
- Tax Breaks

REYNOLDS

NATURE

PRESERVE

William H. Reynolds Memorial Nature Preserve is a 140-acre woodland dedicated to conservation and featuring an appreciation of the natural environment through educational programs. The preserve contains 3.5 miles of meandering, wood-chipped trails, a heritage garden, a compact demonstration site, a herpetology greenhouse, native plants trail, and a historic barn. The Interpretive Center is home to a collection of native reptiles and amphibians as well as an observation building.

Judge William H. Reynolds was not a bird of much consequence to the preserve. He was devoted to the plants of Queen County with the exception that it is unusual and precious to have preservation lands.

The preserve offers numerous opportunities to enjoy nature through many means. Whether you are looking for a quiet place to relax or a place to enjoy a picnic, there is something for everyone.

THE TRIPLE BOTTOM LINE

As a global communications services company, AT&T is proud to be one of the most innovative, technologically advanced, and environmentally responsible companies in the world. We are committed to the triple bottom line: people, planet, and profit.

This commitment is driving AT&T to ensure the environmental responsibility of all of our products, services, and operations. We are committed to the triple bottom line: people, planet, and profit.

There's nothing new about waste that goes into the triple bottom line. Many businesses and organizations are working to reduce waste, conserve energy, and protect the environment. AT&T is committed to the triple bottom line: people, planet, and profit.
